

### XX edition of Euromaintenance

The most Important Event for the World of Industrial Maintenance starts on May 12 in Verona (Italy)

Milan, 3 May - Everything is ready for **Euromaintenance**, as the 2010 edition will be held in Verona from 12 to 14 of May. **Euromaintenance** is the international event for the world of industrial maintenance and asset management, and all qualified operators wanting to update their knowledge, while learning and sharing best business strategies as well as developing concrete business opportunities.

The XX edition will consist of both conference and exhibition (scheduled for May 12 - 13), with the international world-famous conference (due to the subjects discussed and quality of papers given, as evidenced by the on-line programme), combining with the presence of the most important companies in the sector.

In Verona, Euromaintenance promises a truly international event, with speakers and contributors from 30 countries, and special events that will take place with the participation of the major world players of the sector.

The subjects of the 2010 convention will focus on six specific areas: Security, Asset Management, Sustainability, Maintenance Management, Professionalism and Innovation, New Technologies aimed at a qualified target consisting of managers and operations managers, maintenance managers, plant managers, project managers, specialists in performance and reliability, consultants, researchers, etc..

The international conference (reserved to paying participants) takes place over three days (12-14 May), but at Euromaintenance also the 12<sup>th</sup> and 13<sup>th</sup> of May see many special initiatives including conferences and workshops free and open to all delegates and visitors.

On May 12 will take place **MCS Safety & Security Exhibition and Conference**, a special event open to all operators, with seminars and workshops on Fire, Safety and Accident Prevention organized by PrevenzioneIncendiItalia (Italian Fire Prevention Association) in collaboration with AIAS (Italian Association among security officers) and ANCISS (Italian Association of Security and Building Automation).

On May 13 is scheduled another important session opened to all operators, a major conference dedicated to "**Maintenance engineering and tools for Oil&Gas**", organized by AIS (Italian Instrumentation Association) / ISA Italy where will be presented and discussed experiences engineering solutions and maintenance, diagnostic and data management solutions to enhance and improve plant productivity and reduce operating costs.

Many, therefore, are the appointments with the top experts at Euromaintenance 2010, a unique international meeting place and knowledge exchange for managers, decision makers, academics and experts in the field of industrial maintenance.

Euromaintenance 2010 is organized by EIOM in collaboration with AIMAN (Italian Maintenance Association) who will be seeing to the scientific and cultural side of things, aided too by the various associations comprising the EFNMS (European Federation of National Maintenance Societies).

Further information on the event is available on this site: [www.euromaintenance.org](http://www.euromaintenance.org)
