

### **Euromaintenance 2010: rendez-vous in Verona**

*The 20<sup>th</sup> international industrial maintenance event will take place from the 12<sup>th</sup> to the 14<sup>th</sup> of May in the Veronafiere Conference Centre*

Milan, 12 March 2009: Euromaintenance, the international travelling industrial maintenance event, comes to Italy for its 20<sup>th</sup> year in 2010.

In 2008, the Brussels event was visited by over 700 managers and heads of maintenance and operations from 47 countries, with over 200 companies and a total of 5,000 professionals exhibiting.

The new Euromaintenance event is scheduled for the 12<sup>th</sup> to the 14<sup>th</sup> of May 2010, and will take place in Veronafiere.

The organisation of the event has been entrusted to EIOM ("Ente Italiano Organizzazione Mostre"). Since 1956, EIOM has been the Italian leader in industry events. It is also the creator of MCM, a trade show that has become the Italian event of note for industrial maintenance, despite having been held only twice.

The coordination of scientific and cultural events will be handled by AIMAN (Italian Maintenance Association), assisted by the various other members of EFNMS (European Federation of National Maintenance Societies).

The Italian edition of Euromaintenance will also consist of a conference and an expo: this international conference of world-class importance (both for the issues discussed and the quality of the speeches) will take place in the presence of all the main industry players.

The conference is aimed at a very high target: general managers, operations and maintenance heads, plant managers, project managers, efficiency and reliability professionals, consultants, researchers, etc.

The themes covered by the conference will be those of most interest to operators: from predictive, conditional and predetermined maintenance to RAM Engineering (Reliability, Availability, Maintainability); from enhancing the productivity of maintenance personnel to improving energy footprints and environmental protection; from reducing operating costs to revamping industrial plants, from E-Maintenance (Cmms, Rfid, Infomobility) to technological innovation, etc.

We are particularly proud of the direct involvement of OSHA, the European Agency for Safety and Health at Work, which has included Euromaintenance among its key appointments for the 2010/2011 European Commission campaign for the reduction and prevention of accidents during work and maintenance.

The speeches and the specific interests of visiting professionals will focus on maintenance for the processing industry (Oil & Gas, Chemical & Petrochemical, Cement, etc.), energy production (Gas, Coal, Nuclear, Alternative sources, etc.), manufacturing (Cars, Plastics, Aeronautics, Electronics, etc.), the pharmaceutical, food and drinks industries, other "heavy" industries (Mining, Steel, Paper), and, of course, infrastructure and transport (Ports and Airports, Rail, Roads, Electricity, Water and Gas Distribution, Telecoms, Networks, etc.), facilities and building maintenance, and more.

VERONAFIERE

**EIOM**  
Ente Italiano Organizzazione Mostre

SEGRETERIA ORGANIZZATIVA:

Ente Italiano Organizzazione Mostre • Viale Premuda, 2 • I - 20129 Milano • Tel. +39.02.55181842 • Fax +39.02.55184161

eiom@eiomfiere.it • www.eiomfiere.it • Ente fieristico giuridicamente riconosciuto • C.F. 80175770157 • P.IVA 05809330151

These will all incorporate the analysis of case histories and workshops on the planning and/or execution of maintenance projects, down to budgeting and benchmarking.

As well as the conference, Verona will also host the linked international trade expo, open to the main industry players. These will also be able to participate in the conference through technical and application workshops that will allow them to introduce their solutions on "hot" topics to all attendants.

Further information on the event is available on [www.euromaintenance.org](http://www.euromaintenance.org).
